

Your safe passage to the Cloud

Upgrading to the cloud? Take these fool-proof steps.

Where are you on the journey?

I have a legacy system.

Due to a rapidly changing marketplace, I need to adopt new technology and optimize our company's system while staying secure and compliant.

Legacy system

"OK, time to upgrade"

Problems during this phase:

- ! Astronomical costs
- ! Manual provisioning requires time and resources
- ! Fear of loss in investments with overages in infrastructure costs and technical management
- ! Growing security threats with globalization
- ! Keeping up with ever changing compliance requirements
- ! Difficulty managing all tasks required for cloud success (software, infrastructure, technical managed services requirements)

Comparing cloud solutions?

Find a partner that gives you **choice, flexibility, and control.**

- ✓ Deep industry knowledge
- ✓ Flexible to allow transformation at your pace
- ✓ Expert configurations and automated deployments
- ✓ Improving your experience with ongoing code enhancements and innovation
- ✓ Proven success with large scale workloads
- ✓ Scales with your business
- ✓ Partner add-ons to enhance competitive differentiation
- ✓ Transparent subscription pricing
- ✓ Security compliance for unique industry requirements
- ✓ Utility level resistance

Compare cloud solutions

Choose a solution

Choose a trusted, secure, complete cloud solution

Make sure the solution you choose covers your most relevant concerns:

New software, new problems?

Is there thorough planning in place to ensure your staff is properly enabled to get ahead of risk and security threats, while being agile enough to promptly fix issues?

Are they aware of your industry's unique compliance requirements?

Will your cloud partner be keeping up with your industry's regulations, and proactively ensure your software is compliant?

How soon will you start seeing benefits?

How long will it take for a company like yours to get started, and to start seeing the direct cost and efficiency savings?

Will it be worth the cost?

Ask for proof in results of companies like yours. How does the software pay for itself?

SAP S/4HANA Cloud, Private Edition

Reap the benefits of the cloud with the least disruption – and the most security.

Proven results, direct to your bottom line

20%

Reduction in TCO including one-time migration costs.
